Dear Professor Keulks,

Subj 3 -
In Depth Study
of Catalytic
Systems

Thank you very much for your kind letter of September 12, as well as for the information Dr. A.V. Sklyarov gave me about the laboratory of surface research in Milwaukee.

Prof. W.K. Hall has written to me about the difficulties connected with exchange by students. I informed him that this question will, seemingly, be settled at a personal meeting of Prof. G.K. Borekov with Prof. J. Baldeschwiller in Moscow in November. In any case it would be a great pleasure if one of my colleagues goes to your laboratory and yours to mine.

I am looking forward to receiving your proposals concerning further cooperation and intend discussing it in greater detail when we meet. Most probably I shall be able to visit USA in January 1974, but I shall give you more precise information additionally.

Best regards from my colleagues and also from my wife.

With heartiest wishes

Yours sincerely
